## VI. PATENTS ON MICROCHIPS

(1-260)

1. Aberth W. Surface-induced dissociation for mass spectrometry. *United States Patent* 1989;4,851,669.
2. Ackley DE, LeClair TL, Swanson PD. Multicomponent devices for molecular biological analysis and diagnostics. *United States Patent* 2000;6,068,818.
3. Ackley DE, Swanson PD, Graham SO, Mather EL, LeClair TL, Butler WF. Advanced active electronic devices for molecular biological analysis and diagnostics. *United States Patent* 2000;6,099,803.

4. Ackley DE, Sheldon EL, Krihak MK. Stacked, reconfigurable system for electrophoretic transport of charged materials. United States Patent 2001;6,309,602.
5. Ackley DE, Sheldon EL, Krihak MK. System including functionally separated regions in electrophoretic system. United States Patent 2001;6,319,472.
6. Ackley DE, Swanson PD, Graham SO, Mather EL. Advanced active electronic devices including collection electrodes for molecular biological analysis and diagnostics. United States Patent 2001;6,225,059.
7. Ackley DE, Jackson TR, Sheldon III EL. Laminated assembly for active bioelectronic devices. United States Patent 2001;6,287,517.
8. Ackley DE, LeClair TL, Swanson PD. Methods for fabricating multi-component devices for molecular biological analysis and diagnostics. United States Patent 2001;6,254,827.
9. Ackley DE, Graham SO. Advanced active circuits and devices for molecular biological analysis and diagnostics. United States Patent 2001;6,331,274.
10. Ackley DE, Butler WF, Swanson PD. Devices for molecular biological analysis and diagnostics including waveguides. United States Patent 2001;6,315,953.
11. Amigo MGA. Surface modified electrophoretic chambers. United States Patent 1999;5,935,401.
12. Amigo MGA, McCormick RM. Surface modified electrophoretic chambers. United States Patent 2000;6,056,860.
13. Anderson RC, Lipshutz RJ, Rava RP, Fodor SPA. Integrated nucleic acid diagnostic device. United States Patent 1999;5,922,591.
14. Anderson RC, Lipshutz RJ, Rava RP, Fodor SPA. Integrated nucleic acid diagnostic device. United States Patent 2001;6,197,595.
15. Anderson RC, Lipshutz RJ, Rava RP, Fodor SPA. Miniaturized genetic analysis systems and methods. United States Patent 2001;6,168,948.
16. Anderson RC, Lipshutz RJ, Rava RP, Fodor SPA. Method of manipulating a gas bubble in a microfluidic device. United States Patent 2001;6,326,211.
17. Apffel JA, Chakel JA, S. HW, Lichtenwalter K. Integrated planar liquid handling system for maldi-TOF MS. United States Patent 1998;5,705,813.
18. Arnold DW, Schoeniger JS, Cardinale GF. Microfluidic channel fabrication method. United States Patent 2001;6,210,986.
19. Austin RH, Cox EC, Chou C-F. Electrostatically focused thermal cycling device. United States Patent 2001;6,203,683.
20. Backhouse CJ. Fluidic devices. United States Patent 2001;6,318,970.
21. Bader JS, Rothberg JM, Deem MW, et al. Separation of charged particles by a spatially and temporally varying electric field. United States Patent 2001;6,193,866.
22. Balch JW, Carrano AV, Davidson JC, Koo JC. Hybrid slab-microchannel gel electrophoresis system. United States Patent 1998;5,746,901.
23. Beattie KL. Microfabricated, flowthrough porous apparatus for discrete detection of binding reactions. United States Patent 1998;5,843,767.

24. Becker FF, Gascoyne P, Wang X, Vykoukal JV, De Gasperis G. Method and apparatus for programmable fluidic processing. United States Patent 2001;6,294,063.
25. Beebe DJ, Glasgow IK, Wheeler MB. Microfluidic embryo and/or oocyte handling device and method. United States Patent 2001;6,193,647.
26. Bennett WJ, Beach RJ, Ciarlo DR. Monolithic microchannel heatsink. United States Patent 1996;5,548,605.
27. Bennett WJ, Krulevitch PA. Microfluidic interconnects. United States Patent 2001;6,209,928.
28. Benvegna D, McCormick RM. Method for sample injection in microchannel device. United States Patent 1999;5,900,130.
29. Bjornson TO, McCormick RM, Soane DS. Capillary electroflow apparatus and method. United States Patent 2000;6,103,199.
30. Brewer LR, Kimbrough J, Balch J, Davidson JC. System and method for optically locating microchannel positions. United States Patent 2001;6,225,635.
31. Caren MP. Microfluidic pumping. United States Patent 2001;6,296,452.
32. Carrino JJ, Gerrue LO, Diver JM. Multiplex amplification and separation of nucleic acid sequences using ligation-dependant strand displacement amplification and bioelectronic chip technology. United States Patent 2001;6,238,868.
33. Cheng J, Sheldon III EL, Wu L, O'Connell JP. Channel-less separation of bioparticles on a bioelectronic chip by dielectrophoresis. United States Patent 2000;6,071,394.
34. Cheng J, Sheldon III EL, Wu L, O'Connell JP. Channel-less separation of bioparticles on a bioelectronic chip by dielectrophoresis. United States Patent 2001;6,280,590.
35. Chong JM, MacDonald NC. Suspended moving channels and channel actuators for microfluidic applications and method for making. United States Patent 2001;6,180,536.
36. Chow CYH, Parce JW. Variable control of electroosmotic and/or electrophoretic forces within a fluid-containing structure via electrical forces. United States Patent 1998;5,800,690.
37. Chow CYH, Parce JW, McReynolds RJ, Kennedy CB, Bousse LJ. Controller/detector interfaces for microfluidic systems. United States Patent 1999;5,989,402.
38. Chow CYH, Kopf-Sill AR, Parce JW. Electrical current for controlling fluid parameters in microchannels. United States Patent 1999;5,965,410.
39. Chow CYH, Parce JW. Variable control of electroosmotic and/or electrophoretic forces within a fluid-containing structure via electrical forces. United States Patent 1999;5,965,001.
40. Chow CYH. Analytical system and method. United States Patent 1999;5,955,028.
41. Chow CYH. Analytical system and method. United States Patent 2000;6,071,478.
42. Chow. Electrical current for controlling fluid parameters in microchannels. United States Patent 2001;6,174,675.
43. Chow CYH. Multi-layer microfluidic devices. United States Patent 2001;6,167,910.
44. Cozzette SN, Davis G, Itak J, et al. Method of manufacturing a plurality of uniform microfabricated sensing devices having an immobilized ligand receptor. United States Patent 1991;5,063,081.

45. Cozzette SN, Davis G, Holleritter LA, et al. Method for analytically utilizing microfabricated sensors during wet-up. United States Patent 1992;5,112,455.
46. Cozzette SN, Davis G, Itak J, et al. Wholly microfabricated biosensors and process for the manufacture and use thereof. United States Patent 1993;5,200,051.
47. Cozzette SN, Davis G, Lauks IR, et al. Process for the manufacture of wholly microfabricated biosensors. United States Patent 1995;5,466,575.
48. Cozzette SN, Davis G, Lauks IR, et al. Process for the manufacture of wholly microfabricated biosensors. United States Patent 1996; 5,554,339.
49. Cozzette SN, Davis G, Lauks IR, et al. Process for the manufacture of wholly microfabricated biosensors. United States Patent 1998;5,837,454.
50. Cozzette SN, Davis G, Itak J, et al. Process for the manufacture of wholly microfabricated biosensors. United States Patent 1998;5,837,446.
51. Cozzette SN, Davis G, Lauks IR, et al. Methods for microdispensing patterned layers. United States Patent 2001;6,306,594.
52. Davidson JC, Balch JW. Extended length microchannels for high density high throughput electrophoresis systems. United States Patent 2000;6,153,076.
53. DeBoer CD, Fassler W, Pickering JE. Microfluidic image display. United States Patent 2000;6,037,955.
54. Desai A, Yang X, Tai Y-C, Marzluff E, Bockenamp D, Mayo S. Microfluidic sub-millisecond mixers. United States Patent 1999;5,921,678.
55. Dubrow RS, Kennedy CB, Bouse LJ. Microfluidic devices incorporating improved channel geometries. United States Patent 1999; 5,976,336.
56. Dubrow RS. Methods and systems for performing electrophoretic molecular separations. United States Patent 1999;5,948,227.
57. Dubrow RS, Kennedy CB, Bouse LJ. Microfluidic devices incorporating improved channel geometries. United States Patent 2000;6,068,752.
58. Dubrow RS. Methods and compositions for performing molecular separations. United States Patent 2000;6,042,710.
59. Dubrow RS, Kennedy CB, Bouse LJ. Microfluidic devices incorporating improved channel geometries. United States Patent 2001;6,235,175.
60. Dubrow RS, Kennedy CB, Nagle R. Microfluidic devices and systems incorporating cover layers. United States Patent 2001;6,251,343.
61. Edman CF, Nerenberg MI, Westin LP, Carrino JJ. Multiplex amplification and separation of nucleic acid sequences on a bioelectronic microchip using asymmetric structures. United States Patent 2001;6,309,833.
62. Edman CF, Nerenberg MI. Electronically mediated nucleic acid amplification in NASBA. United States Patent 2001;6,326,173.
63. Ekstrom B, Jacobson G, Ohman O, Sjodin H. Microfluidic structure and process for its manufacture. United States Patent 1994;5,376,252.

64. Fare TL, Fan ZH, Heaney PJ. Flow control in microfluidics devices by controlled bubble formation. United States Patent 1999;5,992,820.
65. Faris SM, Jain K, Humphries GM. Microchannel plate technology. United States Patent 1993;5,265,327.
66. Fassler W, Pickering JE, Kin K. Microfluidic writing pen. United States Patent 1999;5,911,533.
67. Field LA, Donald DK, Barth PW, Servaites J, Hoen ST, Harley JA. Gas extraction device for extracting gas from a microfluidics system. United States Patent 2001;6,299,673.
68. Foote RS. Large scale DNA microsequencing device. United States Patent 1997;5,661,028.
69. Foote RS. Large scale DNA microsequencing device. United States Patent 1999;5,944,971.
70. Frankel R, Forsyth JM. Apparatus and method for the detection and assay of organic molecules. United States Patent 1997;5,637,458.
71. Frazier AB. Methods for preparing devices having metallic hollow microchannels on planar substrate surfaces. United States Patent 1999;5,876,582.
72. Frazier AB, Caldwell KD, Gale BK. Micromachined electrical field-flow fractionation system. United States Patent 2000;6,136,171.
73. Freeman DM, Swedberg SA. Integrated miniaturized device for processing and NMR detection of liquid phase samples. United States Patent 2001;6,194,900.
74. Furcht LT, McGlennen RC, Polla DL. Integrated microchip genetic testing system. United States Patent 2000;6,054,277.
75. Furcht LT, McGlennen RC, Polla DL. Integrated microchip genetic testing system. United States Patent 2001;6,303,288.
76. Furlani EP, Ghosh SK, Chatterjee DK. Method of controlling fluid flow in a microfluidic process. United States Patent 2001;6,262,519.
77. Gandhi K, Dubrow RS, Bousse LJ. Methods of fabricating polymeric structures incorporating microscale fluidic elements. United States Patent 2000;6,123,798.
78. Garner HR. Digital optical chemistry micromirror imager. United States Patent 2001;6,295,153.
79. Gold L, Drolet D, Zichi D, Jayasena S, Creighton S, Gill S. Nucleic acid ligand diagnostic Biochip. United States Patent 2001;6,242,246.
80. Griffiths SK, Nilson RH. Method and apparatus for reducing sample dispersion in turns and junctions of microchannel systems. United States Patent 2001;6,270,641.
81. Guigan J. Miniature laboratory for performing biological analyses by chemical reaction on a sample of blood. United States Patent 1991;5,077,013.
82. Gulati S. Method and apparatus for analyzing hybridized biochip patterns using resonance interactions employing quantum expressor functions. United States Patent 2000;6,136,541.
83. Hahn S, Fagnani R. Method of making biochips and the biochips resulting therefrom. United States Patent 2001;6,174,683.

84. Hamilton RE, Kennedy PG. Microchannel cooling using aviation fuels for airborne electronics. United States Patent 1997;5,692,558.
85. Hamilton RE, Kennedy PG, Vale CR. Non-mechanical magnetic pump for liquid cooling. United States Patent 1998;5,763,951.
86. Hamilton RE, Fagan TJ, Kennedy PG, Woodward WS. Closed loop liquid cooling for semiconductor RF amplifier modules. United States Patent 1999;5,901,037.
87. Hancock WS, Chakel JA, Apffel JA, Lichtenwalter K. Integrated nucleic acid analysis system for MALDI-TOF MS. United States Patent 1998;5,716,825.
88. Havens JR, Krihak MK, Greef CH, Raymond DE, Heller MJ. Inorganic permeation layer for micro-electric device. United States Patent 2001;6,306,348.
89. Hayes DJ, Wallace DB, Frederickson CJ. Making apparatus for conducting biochemical analyses. United States Patent 1998;5,849,208.
90. Hayes DJ, Wallace DB, Frederickson CJ. Flexible apparatus with ablation formed chamber(s) for conducting biochemical analyses. United States Patent 2002;6,334,980.
91. Heller MJ, Tu E. Active programmable electronic devices for molecular biological analysis and diagnostics. United States Patent 1997;5,605,662.
92. Heller MJ, Tu E, Butler WF. Molecular biological diagnostic systems including electrodes. United States Patent 1997;5,632,957.
93. Heller MJ, O'Connell JP, Juncosa RD, Sosnowski RG, Jackson TR. Methods for hybridization analysis utilizing electrically controlled hybridization. United States Patent 1998;5,849,486.
94. Heller MJ, Tu E. Methods for electronic synthesis of polymers. United States Patent 1999;5,929,208.
95. Heller MJ. Methods for electronic stringency control for molecular biological analysis and diagnostics. United States Patent 2000;6,017,696.
96. Heller MJ. Method for reducing the linear dimension necessary for high resolution electrophoretic separation. United States Patent 2000;6,013,166.
97. Heller MJ, Sosnowski RG. Method for fingerprinting utilizing an electronically addressable array. United States Patent 2001;6,245,508.
98. Heller MJ, Tu E, Evans GA, Sosnowski RG. Methods for transport in molecular biological analysis and diagnostics. United States Patent 2001;6,238,624.
99. Humphries GMK, Miller DL, Libby JM, Schwartz HL. Cell assay device used in a microphysiometer. United States Patent 1992;5,104,804.
100. Humphries GMK. Cell assay device. United States Patent 1996;5,536,662.
101. Ikeda M, Uchihara H. Micro analytical method, sampling plate used in same, method of detecting organic compound by use of said micro analytical method, apparatus for same and method of dividing for micro-liquid flow. United States Patent 1994;5,334,837.
102. Jacobson SC, Ramsey JM. Microfabricated device and method for multiplexed electrokinetic focusing of fluid streams and a transport cytometry method using same. United States Patent 2000;6,120,666.

103. Jacobson SC, Ramsey JM. Microfluidic circuit designs for performing electrokinetic manipulations that reduce the number of voltage sources and fluid reservoirs. United States Patent 2000;6,062,261.
104. Jacobson SC, Ramsey JM. Microfluidic circuit designs for performing fluidic manipulations that reduce the number of pumping sources and fluid reservoirs. United States Patent 2001;6,213,151.
105. John HR, Winger TM, Krotz J, Dan S, Onofrey TJ. Permeation layer attachment chemistry and method. United States Patent 2001;6,303,082.
106. Juncosa RD, Butler WF, Wu L, Cormack RH. Scanning optical detection system. United States Patent 2001;6,309,601.
107. Karger BL, Foret F, Zavracky PM, McGruer EN, Xue Q, Dunayevskiy YM. Microscale fluid handling system. United States Patent 1999;5,872,010.
108. Kaye PH, Tracey M. Biorheological measurement. United States Patent 1994;5,327,777.
109. Kayyem JF, Blackburn G, O'Connor SD. Systems for electrophoretic transport and detection of analytes. United States Patent 2001;6,290,839.
110. Kayyem JF, O'Connor SD, Gozin M, Yu C, Meade TJ. Methods of detecting nucleic acids using electrodes. United States Patent 2001;6,221,583.
111. Kellogg G, Kieffer-Higgins SG, Carvalho BL, et al. Devices and methods for using centripetal acceleration to drive fluid movement on a microfluidics system. United States Patent 2000;6,063,589.
112. Kellogg G, Kieffer-Higgins SG, Carvalho BL, et al. Device and method for using centripetal acceleration to device fluid movement on a microfluidics system. United States Patent 2001;6,302,134.
113. Kennedy CB. Microfluidic devices and systems. United States Patent 1999;5,876,675.
114. Kennedy CB. Microfluidic devices and systems. United States Patent 2000;6,048,498.
115. Kennedy CB. Multiplexed microfluidic devices and systems. United States Patent 2000;6,086,740.
116. Kennedy C. Fabrication of microfluidic circuits by printing techniques. United States Patent 2000;6,074,725.
117. Kercso JE, Sundberg SA, Wolk JA, Toth AW, Chow CYH, Parce JW. High throughput microfluidic systems and methods. United States Patent 2000;6,132,685.
118. Knapp M, Parce JW, Bousse LJ, Kopf-Sill AR. Closed-loop biochemical analyzers. United States Patent 2001;6,235,471.
119. Kopf-Sill AR, Parce JW. Microfluidic systems incorporating varied channel dimensions. United States Patent 1998;5,842,787.
120. Kopf-Sill AR. Methods and systems for monitoring and controlling fluid flow rates in microfluidic systems. United States Patent 1999;6,001,231.
121. Kopf-Sill AR, Parce JW. Microfluidic systems incorporating varied channel dimensions. United States Patent 1999;5,957,579.
122. Kopf-Sill AR, Chow AW. Optimized high-throughput analytical system. United States Patent 2000;6,150,119.
123. Kopf-Sill AR, Parce JW. Microfluidic systems incorporating varied channel dimensions. United States Patent 2001;6,186,660.

124. Kopf-Sill AR. Inefficient fast PCR. United States Patent 2001;6,303,343.
125. Kopf-Sill AR. Methods and systems for monitoring and controlling fluid flow rates in microfluidic systems. United States Patent 2001;6,221,226.
126. Kovacs GTA. Micromachined fluidic coupler. United States Patent 1999;5,890,745.
127. Kovacs GTA. Multiplexed active biologic array. United States Patent 1999;5,965,452.
128. Kovacs GTA. Multiplexed active biologic array. United States Patent 2001;6,258,606.
129. Kricka LJ, Wilding P. Mesoscale sperm handling devices. United States Patent 1994;5,296,375.
130. Kricka LJ, Wilding P. Mesoscale sperm handling devices. United States Patent 1995;5,427,946.
131. Kricka LJ, Wilding P. Mesoscale devices and methods for analysis of motile cells. United States Patent 1998;5,744,366.
132. Krulevitch PA, Lee AP, Northrup MA, Benett WJ. Microfabricated instrument for tissue biopsy and analysis. United States Patent 6,319,474.
133. Krulevitch PA, Lee AP, Northrup MA, Benett WJ. Microfabricated instrument for tissue biopsy and analysis. United States Patent 1999; 5,985,217.
134. Kumar R. Padlock probe detection. United States Patent 1999;5,912,124.
135. Landers JP, Huang Z, Huhmer A. Method and apparatus for electronically controlled scanning of micro-area devices. United States Patent 2001;6,246,046.
136. Lee AP, Northrup MA, Ahre PE, Dupuy PC. Polymer micromold and fabrication process. United States Patent 1997;5,658,515.
137. Lee AP, Krulevitch PA, Northrup MA, Trevino JC. Microvalve. United States Patent 1998;5,819,749.
138. Lee AP, Northrup MA, Ciarlo DR, Krulevitch PA, Benett WJ. Release mechanism utilizing shape memory polymer material. United States Patent 2000;6,102,933.
139. Lievan BA. Microchip optical transport technology for use in a personal flow cytometer. United States Patent 2000;6,097,485.
140. Lindberg P, Roeraade J, Stjernstrom M, Viovy JL. Integrated microfluidic element. United States Patent 2001;6,322,753.
141. Lipshutz RJ, Rava RP, Anderson RC, Fodor SPA. Integrated nucleic acid diagnostic device. United States Patent 1999;5,856,174.
142. Lipshutz RJ, Rava RP, Anderson RC, Fodor SPA. Integrated nucleic acid diagnostic device. United States Patent 2000;6,043,080.
143. Loewy Z, Kumar R. Microfluidic method for nucleic acid amplification. United States Patent 1999;5,939,291.
144. Lum P, Greenstein M. Microfluidic structure assembly with mating microfeatures. United States Patent 1999;5,932,315.

145. Mandecki W. Screening of soluble chemical compounds for their pharmacological properties utilizing transponders. United States Patent 1999;5,981,166.
146. Mandecki W. Multiplex assay for nucleic acids employing transponders. United States Patent 2000;6,051,377.
147. Mandecki W. Method of determining the sequence of nucleic acids employing solid-phase particles carrying transponders. 2000;6,046,003.
148. Mastrangelo CH, Man PF, Webster JR. Polymer-based micromachining for microfluidic devices. United States Patent 2000;6,136,212.
149. Mathies RA, Woolley AT. Miniature reaction chamber and devices incorporating same. United States Patent 2000;6,132,580.
150. Mathies RA, Glazer A, Woolley AT, Lao K. Electrochemical detector integrated on microfabricated capillary electrophoresis chips. United States Patent 2000;6,045,676.
151. Mathies RA, Woolley AT. Miniature reaction chamber and devices incorporating same. United States Patent 2001;6,284,525.
152. McBride SE, M. MIR. Method and apparatus for distributing fluid in a microfluidic device. United States Patent 2001;6,268,219.
153. McReynolds RJ. Method of manufacturing microfluidic devices. United States Patent 1999;5,882,465.
154. McReynolds RJ. Methods of manufacturing microfabricated substrates. United States Patent 2001;6,182,733.
155. Mehta TB, Kopf-Sill AR. Microfluidic matrix localization apparatus and methods. United States Patent 2001;6,306,590.
156. Mian A, Kieffer-Higgins SG, Corey GD. Devices and methods for using centripetal acceleration to drive fluid movement in a microfluidics system. United States Patent 2001;6,319,469.
157. Mirzabekov AD, Lysov YP, Dubley SA. Miniaturized reaction vessel system, method for performing site-specific biochemical reactions and affinity fractionation for use in DNA sequencing. United States Patent 2000;6,143,499.
158. Mitsuhashi M, Ogura M, Watanabe K, Agata Y. Detection of degradation of RNA using microchannel electrophoresis. United States Patent 2001;6,251,247.
159. Moles DR. Microfluidic analyzer module. United States Patent 1999;5,932,799.
160. Moles DR. Fluid flow module. United States Patent 2000;6,073,482.
161. Moon JE, Davis TJ, Galvin GJ. Integrated monolithic microfabricated electrospray and liquid chromatography system and method. United States Patent 2001;6,245,227.
162. Moroney III RM, Kumar R, Fishman DM. Capacitive denaturation of nucleic acid. United States Patent 1999;5,993,611.
163. Mundinger DC, Scifres DR. Waste heat removal system. United States Patent 1995;5,453,641.
164. Nagle R, Kennedy CB. Microfluidic devices and systems incorporating integrated optical elements. United States Patent 2000;6,100,541.
165. Nagle R, Dubrow RS. Integrated devices and systems for performing temperature controlled reactions and analyses. United States Patent 2001;6,171,850.

166. Nagle R, Kennedy CB. Microfluidic devices and systems incorporating integrated optical elements. United States Patent 2001;6,316,781.
167. Nagle R, Dubrow RS. Methods and integrated devices and systems for performing temperature controlled reactions and analyses. United States Patent 2002;6,337,212.
168. Nakajima M, Kikuchi Y, Kawakatsu T, Komori H, Yonemoto T. Cross-flow microchannel apparatus and method of producing or separating emulsions making use thereof. United States Patent 2001;6,258,858.
169. Nelson RJ, Hooper HH, Hauser AK, Sassi AP. Integrated microfluidic devices. United States Patent 1999;6,007,690.
170. Nelson RJ, Hooper HH, Hauser AK, Singh S, Williams SJ, Sassi AP. Microfluidic method for nucleic acid purification and processing. United States Patent 2000;6,074,827.
171. Neukermans AP. Microfluidic valve and integrated microfluidic system. United States Patent 2000;6,068,751.
172. Nikiforov TT, Jeong S. Methods and systems for enhanced fluid transport. United States Patent 1999;5,964,995.
173. Nikiforov TT. Apparatus and methods for sequencing nucleic acids in microfluidic systems. United States Patent 1999;5,958,694.
174. Nikiforov TT, Jeong S. Methods and systems for enhanced fluid transport. United States Patent 2000;6,129,826.
175. Nikiforov TT. Apparatus and methods for sequencing nucleic acids in microfluidic systems. United States Patent 2000;6,107,044.
176. Nikiforov TT. Assay methods and system. United States Patent 2001;6,287,774.
177. Nikiforov TT. Apparatus and methods for sequencing nucleic acids in microfluidic systems. United States Patent 2001;6,316,201.
178. Northrup MA, Mariella Jr. RP, Carrano AV, Balch JW. Silicon-based sleeve devices for chemical reactions. United States Patent 1996;5,589,136.
179. Northrup MA, White RM. Microfabricated reactor. United States Patent 1997; 5,674,742.
180. Northrup MA, Yu CM, Raley NF. Porous silicon structures with high surface area/specific pore size. United States Patent 1999;5,882,496.
181. Northrup MA, Yu CM, Raley NF. Process for forming a porous silicon member in a crystalline silicon member. United States Patent 1999;6,004,450.
182. Oh CS. Microfluidic electrophoresis device. United States Patent 1999;5,904,824.
183. Ohman O. Method of producing a sealing means in a microfluidic structure and a microfluidic structure comprising such sealing means. United States Patent 1995;5,443,890.
184. Okano K, Kambara H. Separation of polynucleotides using supports having a plurality of electrode-containing cells. United States Patent 1995;5,434,049.
185. Okano K, Kambara H. Device for separating polynucleotides having a plurality of electrode-containing cells and movable collecting capillary. United States Patent 1997;5,607,646.
186. Parce JW. Fourier detection of species migrating in a microchannel. United States Patent 1997;5,699,157.

187. Parce JW. Fourier detection of species migrating in a microchannel. United States Patent 1998;5,852,495.
188. Parce JW, Knapp MR. Electropipettor and compensation means for electrophoretic bias. United States Patent 1998;5,779,868.
189. Parce JW, Knapp MR, Bousse L. High throughput screening assay systems in microscale fluidic devices. United States Patent 1999;5,942,443.
190. Parce JW, Knapp MR. Electropipettor and compensation means for electrophoretic bias. United States Patent 1999;5,972,187.
191. Parce JW, Knapp MR, Chow CYH, Bousse L. Controlled fluid transport in microfabricated polymeric substrates. United States Patent 1999;5,885,470.
192. Parce JW, Kopf-Sill AR. Methods and apparatus for in situ concentration and/or dilution of materials in microfluidic systems. United States Patent 1999;6,004,515.
193. Parce JW, Kopf-Sill AR, Bousse LJ. High throughput screening assay systems in microscale fluidic devices. United States Patent 2000;6,046,056.
194. Parce JW, Kopf-Sill AR. Apparatus for in situ concentration and/or dilution of materials in microfluidic systems. United States Patent 2000;6,149,870.
195. Parce JW, Knapp MR, Chow CYH, Bousse L. Controlled fluid transport microfabricated polymeric substrates. United States Patent 2000;6,156,181.
196. Parce JW, Knapp MR. Microfluidic sampling system and methods. United States Patent 2000;6,042,709.
197. Parce JW. Micropump. United States Patent 2000;6,012,902.
198. Parce JW, Knapp MR. Electropipettor and compensation means for electrophoretic bias. United States Patent 2000;6,080,295.
199. Parce JW, Kopf-Sill AR, Bousse LJ. High throughput screening assay systems in microscale fluidic devices. United States Patent 2001;6,306,659.
200. Parce JW. Micropump. United States Patent 2001;6,171,067.
201. Parce JW, Knapp MR. Electropipettor and compensation means for electrophoretic bias. United States Patent 2001;6,287,520.
202. Parce JW, Knapp MR, Chow CYH, Bousse L. Controlled fluid transport in microfabricated polymeric substrates. United States Patent 2001;6,238,538.
203. Parce JW. Fourier detection of species migrating in a microchannel. United States Patent 2001;6,233,048.
204. Parce JW. Microfluidic devices for electrophoretic analysis of materials. United States Patent 2002;6,337,740.
205. Paul PH, Arnold DW, Neyer DW. Sample injector for high pressure liquid chromatography. United States Patent 2001;6,290,909.
206. Perov A, Belgovskiy AI, Mirzabekov AD. Biochip scanner device. United States Patent 2001;6,329,661.
207. Petersen KE, McMillan WA, Kovacs GTA, Young SJ. Reaction vessel for heat-exchanging chemical processes. United States Patent 1999;5,958,349.

208. Ramsey JM. Apparatus and method for performing microfluidic manipulations for chemical analysis. United States Patent 1999;6,001,229.
209. Ramsey JM. Apparatus and method for performing microfluidic manipulations for chemical analysis and synthesis. United States Patent 1999;5,858,195.
210. Ramsey JM. Apparatus and method for performing microfluidic manipulations for chemical analysis and synthesis. United States Patent 2000;6,033,546.
211. Regnier F, He B. In situ micromachined mixer for microfluidic analytical systems. United States Patent 2001;6,170,981.
212. Schembri CT, Overman LB, Hotz CZ. Apparatus for conducting chemical or biochemical reactions on a solid surface within an enclosed chamber. United States Patent 2001;6,258,593.
213. Simpson JW, Rothberg JM, Went GT. Apparatus and method for the generation, separation, detection, and recognition of biopolymer fragments. United States Patent 1999;5,993,634.
214. Simpson PC, Mathies RA, Woolley AT. Microfabricated capillary array electrophoresis device and method. United States Patent 2000;6,143,152.
215. Simpson JW, Rothberg JM, Went GT. Apparatus and method for the generation, separation, detection, and recognition of biopolymer fragments. United States Patent 2001;6,236,945.
216. Smolko D, Sheldon E, Swanson P, et al. Apparatus and method for removing small molecules and ions from low volume biological samples. United States Patent 2001;6,284,117.
217. Soane DS, Soane ZM. Acrylic microchannels and their use in electrophoretic application. United States Patent 1999;5,858,188.
218. Soane DS, Soane ZM. Method and device for moving molecules by the application of a plurality of electrical fields. United States Patent 2000;6,093,296.
219. Soane DS, Soane ZM, Hooper HH, Amigo MGA. Acrylic microchannels and their use in electrophoretic applications. United States Patent 2000;6,054,034.
220. Soane DS, Soane ZM, Hooper HH, Amigo MGA. Methods for fabricating enclosed microchannel structures. United States Patent 2001;6,176,962.
221. Soper SA, Davies JD, Vladimirov Y. Microsystem for rapid DNA sequencing. United States Patent 1998;5,846,727.
222. Sosnowski RG, Butler WF, Tu E, Nerenberg MI, Heller MJ, Edman CF. Methods and procedures for molecular biological analysis and diagnostics. United States Patent 2000;6,051,380.
223. Staskus MP, Haden JM. Cooler for removing heat from a heated region. United States Patent 1998;5,835,345.
224. Sundberg SA, Parce JW, Chow CYH. Microfabricated structures for facilitating fluid introduction into microfluidic devices. United States Patent 2000;6,086,825.
225. Swierkowski SP, Davidson JC. Vacuum fusion bonding of glass plates. United States Patent 2000;6,131,410.
226. Swierkowski SP. T-load microchannel array and fabrication method. United States Patent 2000;6,110,332.
227. Swierkowski SP. Vacuum fusion bonded glass plates having microstructures thereon. United States Patent 2001;6,301,931.

228. Swierkowski SP, Davidson JC, Balch JW. Vacuum fusion bonding of glass plates. United States Patent 2001;6,289,695.
229. Tai Y-C, Desai A, Lee T, Davis M. MEMS electro spray nozzle for mass spectroscopy. United States Patent 1999;5,994,696.
230. Taylor DL. Miniaturized cell array methods and apparatus for cell-based screening. United States Patent 2000;6,103,479.
231. Thorp HH, Loomis CR, Napier ME. Polymer-electrodes for detecting nucleic acid hybridization and method of use thereof. United States Patent 1999;5,968,745.
232. Ullman EF, Stauber GB. Capillary assays involving separation of free and bound species. United States Patent 2000;6,103,537.
233. Victor Jr RL, Stokes JH. Microfluidic connector. United States Patent 2001;6,319,476.
234. Vo-Dinh T, Wintenberg A, Ericson MN. Integrated circuit biochip microsystem containing lens. United States Patent 2001;6,197,503.
235. Wainright AK, Visser I, Singh S. Methods and compositions for conducting processes in microfluidic devices. United States Patent 2001;6,306,273.
236. Watson Jr. RM, Chaudhry HR, Lee JS. Biochip detection system. United States Patent 2001;6,271,042.
237. Wilding P, Kricka LJ, Zemel JN. Fluid handling in mesoscale analytical devices. United States Patent 1994;5,304,487.
238. Wilding P, Kricka LJ. Mesoscale polynucleotide amplification devices. United States Patent 1996;5,587,128.
239. Wilding P, Kricka LJ. Mesoscale polynucleotide amplification device and method. United States Patent 1996;5,498,392.
240. Wilding P, Kricka LJ. Analysis based on flow restriction. United States Patent 1996;5,486,335.
241. Wilding P, Kricka LJ, Zemel JN. Methods and apparatus for the detection of an analyte utilizing mesoscale flow systems. United States Patent 1997;5,637,469.
242. Wilding P, Kricka LJ, Zemel JN. Fluid handling methods for use in mesoscale analytical devices. United States Patent 1997;5,635,358.
243. Wilding P, Kricka LJ. Mesoscale sample preparation device and systems for determination and processing of analytes. United States Patent 1998;5,726,026.
244. Wilding P, Kricka LJ. Mesoscale polynucleotide amplification device and method. United States Patent 1999;5,955,029.
245. Wilding P, Kricka LJ. Mesoscale sample preparation device and systems for determination and processing of analytes. United States Patent 1999;5,928,880.
246. Wilding P, Kricka LJ, Zemel JN. Apparatus for the detection of an analyte utilizing mesoscale flow systems. United States Patent 1999;5,866,345.
247. Wise KD, Chen J. Microchannel system for fluid delivery. United States Patent 1999;5,989,445.
248. Wolk JA. Method of making a capillary for electrokinetic transport of materials. United States Patent 2000;6,148,508.

249. Wolk JA, McReynolds RJ, Parce JW. Alignment of multicomponent microfabricated structures. United States Patent 2001;6,322,683.
250. Wrighton MS. Microelectrochemical devices based on inorganic redox active material and method for sensing. United States Patent 1990;4,936,956.
251. Yang H, Sundberg SA. Surface coating for microfluidic devices that incorporate a biopolymer resistant moiety. United States Patent 2001;6,326,083.
252. Yao N-K, Wan Y-M, Chen C, Hung L-Y, Wang S-H, Chang S-W. Apparatus and method for driving a microflow. United States Patent 2001;6,192,939.
253. Zanzucchi PJ, Cherukuri S, McBride SE. Partitioned microelectronic and fluidic device array for clinical diagnostics and chemical synthesis. United States Patent 1996;5,585,069.
254. Zanzucchi PJ, Cherukuri S, McBride SE. Etching to form cross-over, non-intersecting channel networks for use in partitioned microelectronic and fluidic device arrays for clinical diagnostics and chemical synthesis. United States Patent 1997;5,681,484.
255. Zanzucchi PJ, Cherukuri S, McBride SE, Judd AK. Method of synthesis of plurality of compounds in parallel using a partitioned solid support. United States Patent 1997;5,643,738.
256. Zanzucchi PJ, Cherukuri S, McBride SE, Judd AK. Partitioned microelectronic device array. United States Patent 1997;5,593,838.
257. Zanzucchi PJ, Cherukuri S, McBride SE. Partitioned microelectronic device array. United States Patent 1998;5,755,942.
258. Zanzucchi PJ, Cherukuri S, McBride SE, Judd AK. Partitioned microelectronic device array. United States Patent 1999;5,863,708.
259. Zanzucchi PJ, Cherukuri S, McBride SE. Immunological assay conducted in a microlaboratory array. United States Patent 1999;5,858,804.
260. Zinck JJ, Baukus JP. Multichannel plate assembly for gas source molecular beam epitaxy. United States Patent 1993;5,188,671.
